PROFESSIONAL SUMMARY

Electronics and Computer Engineering graduate with hands-on experience building full-stack, AI/ML and computer-vision projects in Python, Java and React, and testing them with Selenium, TestNG and JUnit. Python developer intern (Infosys Springboard), hackathon winner and finalist, seeking an entry-level software engineering, AI/ML or QA role.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, JavaScript, TypeScript

Web & Backend: React, Next.js, Node.js, FastAPI, Flask, Spring Boot, Tailwind CSS, REST APIs

Databases: MySQL, PostgreSQL, MongoDB, Firebase/Firestore

AI/ML & Data: scikit-learn, YOLOv8, ByteTrack, Hugging Face, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau; exposure to RAG, LangChain, ChromaDB

Cloud & Tools: AWS, Google Cloud, Docker, Git/GitHub, Linux/shell scripting, Postman

Testing: Selenium WebDriver, TestNG, JUnit, manual testing (SDLC/STLC, test case design, defect life cycle)

Core: Data Structures & Algorithms, OOP, Agile (sprints, stand-ups)

EXPERIENCE

Python Full-Stack Developer Trainee, QSpiders

Apr 2026 – Present

- Building full-stack applications in Python with database-backed features and REST APIs.
- Writing test automation with Selenium WebDriver and TestNG, alongside manual testing in Agile sprints.

Python Developer Intern, Infosys Springboard

Jan 2025 – Mar 2025

- Built an automated check-extraction tool with PDF parsing, data validation and CSV export.
- Applied OOP, PostgreSQL and API integration to store and process the extracted data.

PROJECTS

AgriAdvisor – AI/ML assistant and e-commerce platform for farmers [GitHub](#)

Team Lead

- Led the team building a React, TypeScript and Firebase platform with a Python ML backend and IoT sensor integration.
- Trained ML models for crop recommendation and plant disease detection.

Store Intelligence Pipeline – Purple hackathon [GitHub](#)

YOLOv8, ByteTrack, FastAPI

- Built a computer-vision pipeline to detect and track people in store video using YOLOv8 and ByteTrack.
- Exposed results through a complete FastAPI backend.

Guardian Earth – AI disaster prediction platform [GitHub](#)

Regional Finalist

- Built a React, Node.js and Flask application with scikit-learn models for disaster prediction.
- Reached the regional finals of the Global Sustainability Challenge.

Email Triage Agent – Meta PyTorch OpenEnv Hackathon [GitHub](#)

Hugging Face, FastAPI, Docker

- Built an email-triage environment using Hugging Face LLM inference and API endpoints, packaged with Docker.

Investment Portfolio Tracker – Java application

Java, JDBC, MySQL

- Designed a multi-table MySQL schema (clients, holdings, transactions) with joins and views; added validation and exception handling.

EDUCATION

B.Tech, Electronics and Computer Engineering, PES College of Engineering, Chhatrapati Sambhajnagar (BATU)

2022 – 2026

CGPA: 7.7/10. Coursework: digital electronics, computer architecture, VLSI, wireless communication, embedded/IoT.

ACHIEVEMENTS & CERTIFICATIONS

- 1st Place, hackathon (Elder Care Reminder System); Regional Finalist, Global Sustainability Challenge; Top 100 of 90,000+, PartyRock GenAI hackathon; GHC & GHCI Scholar 2024.
- AWS Academy Cloud Foundations; Google Cybersecurity Professional Certificate; Google Cloud and Generative AI Study Jam 2024; Amazon ML Summer School 2025; Postman API Student Expert; 20+ Unstoppable certificates (DSA, CP, software development).
- Open source: GirlScript Summer of Code contributor. Student Placement Cell member.
